RELEVANT PAST PERFORMANCE

Health Information Integrity Team Support

Immediate Office of the Director (IOD) at Centers for Disease Control and Prevention (CDC)

We support the CDC's Health Information Integrity Team (HIIT) by enhancing its ability to combat health misinformation and reinforce public trust. Leveraging program management, advanced social media monitoring tools integrated with CDC systems, we provide data collection, integration (ETL), analysis, and reporting, ensuring compliance with federal privacy standards. Our efforts enable the CDC to proactively address misinformation trends, sentiment, and public concerns. Despite challenges such as misinformation variability and integration complexities, our adaptive approach ensures timely insights. Through daily monitoring, tailored training, and actionable strategies, TSV has strengthened the CDC's capacity to address public health challenges and safeguard trust in its communications.

Digital Tools Detecting Infectious Disease Misinformation

National Institute of Allergy and Infectious Diseases (NIAID) at the National Institutes of Health (NIH)

We developed a SaaS platform for the National Institutes of Health (NIH) to combat misinformation, particularly about COVID-19 vaccines. Leveraging Artificial Intelligence (AI), Machine Learning (ML), and Natural Language Processing (NLP), the platform identifies and analyzes misinformation across digital platforms like Twitter and podcasts. It detects sentiment, evaluates social influence, and flags Twitter bot accounts spreading false claims, empowering researchers and public health professionals with powerful tools, including data visualizations and intuitive dashboards, to analyze trends and combat misinformation effectively. Built with Agile methodology and AWS infrastructure, the platform ensures scalability and security. With an 82% accuracy rate, its data visualizations and intuitive dashboards empower public health professionals to analyze trends and prioritize interventions effectively.

Gunsmith Services for the US Marshall Service

Department of Justice
US Marshall Service

We provide comprehensive gunsmith services to the U.S. Marshals Service (USMS), ensuring firearm maintenance, repair, and inventory management align with OEM standards and USMS policies. Our team implements robust inventory control systems, conducts regular audits, and ensures accurate, accessible data to prevent asset mismanagement. We deliver formal firearms maintenance training and provide ongoing support to keep personnel informed of industry advancements. Prioritizing safety and compliance, we adhere to federal regulations and USMS protocols. With a focus on program management, quality control, and stakeholder collaboration, TSV-ELG ensures operational readiness and supports USMS in achieving its mission objectives.

Data Processing Resources

Centers for Disease Control National Institute for Occupational Safety and Health (NIOSH)

We provided Data Entry Support Services to the CDC's National Institute for Occupational Safety and Health (NIOSH) under NAICS code 541990. Our team supplied eight full-time employees (FTEs) to support NIOSH/DFSE, including roles such as Data Entry Clerks and Data Processing Clerks (Levels I and II). These personnel contributed to occupational health and exposure studies and surveillance efforts, ensuring accurate data management and processing to advance NIOSH's mission of promoting workplace safety and health through effective data collection and analysis.

Administration Acquisition Support

Department of Agriculture, USDA Forest Service

We provided comprehensive Administrative Acquisition Support Services for the USDA Forest Service at its Atlanta, Georgia site. Our work included drafting market research reports, acquisition strategies, and performance-related documents. We conducted market research, coordinated with CORs to track costs, milestones, and deliverables, and supported contract evaluations and closeouts. Additionally, we tracked invoices, burn rates, and credentialing requests, facilitated training logistics, and delivered monthly engagement summaries to enhance portfolio tracking and performance measurement, ensuring efficient and effective acquisition support for the agency.

Management, Administrative and Budget Support Services
Centers for Disease Control and Prevention, Multiple Locations Serviced

We provided comprehensive Budget Analyst Support, including budget planning, execution, closeout, compliance, analytics, and training. We developed standard operating procedures and supported specialized funding initiatives such as IAAs, gifts, user fees, and CRADAs. Our team of six Budget Analysts (FTEs) ensured efficient budget operations, compliance, and resource optimization, delivering tailored solutions to enhance the Office of Budget Services' overall performance and support its critical financial management objectives.
